### KOALA

Koalas live in Australia. They look like bears. But they are not bears. They are grey or brown. They are not big. They live in trees. They can climb trees; they can walk and run, but not very fast. Koalas can't jump like kangaroos.

Koalas have a thick coat and small body; they have long arms and legs. They have big ears, a big nose and small eyes. They don't have a tail, but they have a pouch for a baby. A baby koala is only 2 centimeters long. It is tiny. It doesn't have any hair. Young koalas live in mother's pouch for about 6 months.

Koalas live for about 16 years. They eat eucalyptus leaves. They sleep for about 20 hours a day.
